

ASM

SKEWER MACHINE

Automatic skewer production

FEATURES OF THE ASM

- ✓ Suitable for round and square shapes
- ✓ Suitable for various product masses
- ✓ Capacity up to 30 skewers per minute
- ✓ Highly accurate portion control
- ✓ Easy to operate and simple to clean

DESCRIPTION

The Skewer Machine automates both forming and skewering. The machine processes various types of mixtures including meat, vegetables, vegetarian blends and different cheese types. By connecting directly to a vacuum filler, portions are formed with high precision while keeping the process clean and efficient.
